File: JPAB

Feb 12, 1992

DOCUMENT-IDENTIFIER: JP 04041421 A
TITLE: PULMONARY ABSORBABLE COMPOSITION

Abstract Text (2):

CONSTITUTION: A pulmonary absorbable composition, containing one or two or more compounds (e.g. insulin) selected from proteins, peptides and derivatives thereof and prepared by regulating the pH of an aqueous solution to 3-4 with a pH adjuster, preferably a citric acid buffer solution or, in the case of powder, regulating the pH to 3-4 when dissolved in water and/or blending 0.1-5 wt.% surfactant, preferably sorbitan trioleate therewith. The administration form thereof is preferably an aerosol composition containing the proteins, peptides or derivatives thereof, a dispersing agent or an aqueous solution and a propellant.
